OF FOETUS......

Though tiny and small, we can still recognize the perfect forms of the hands and feet.

tiny hands and feets

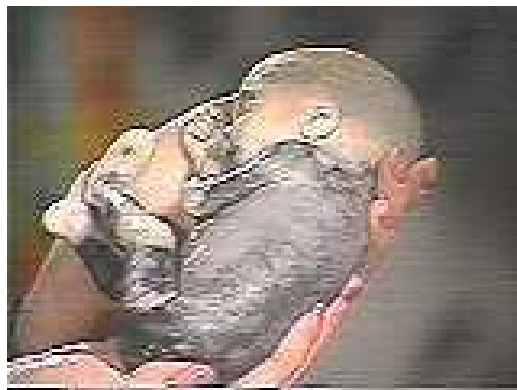

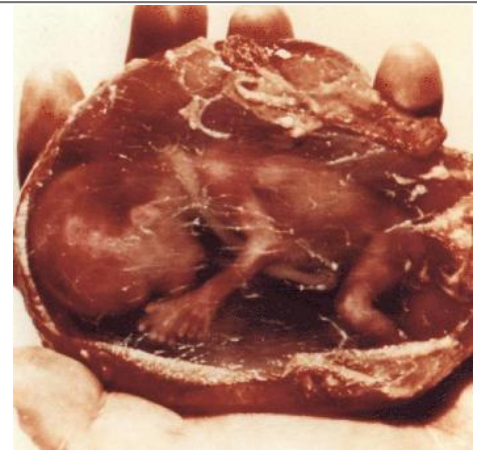

First Trimester (9 Week) Abortion

First Trimester abortion

hysteromoy aborted baby

Foetus in a piece of flesh

Even at six weeks old, yet the size of a dime, we have a well-formed human being who is entitled to Life, Liberty, and the Pursuit of Happiness. WE OWE these great principles to our future generations: to love them from their very beginnings as God loves us!

legs of a six week old baby , the size of a dime

How proud this doctor must be in his work! Perhaps he feels he is performing a service to the world by keeping the minority population down. Margaret Sanger and the population gods would be proud!

head of an aborted foetus

Baby Partial Birth

dead foetus on its side

1st Trimester - 11 week abortion

A 11-week aborted baby.

The remains of a aborted baby of D&C.

**The eye of an aborted foetus.**

An aborted foetus of first trimester in the abortionist's hands.

A baby's head in a jar.
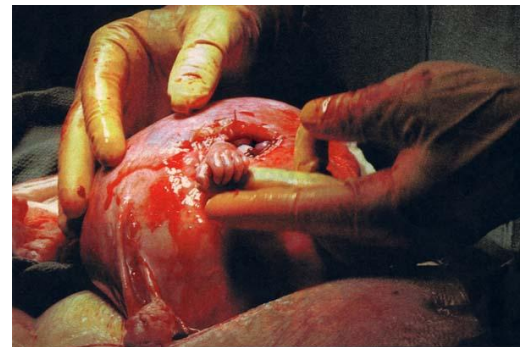

The aborted babies are placed in tubs.

The aborted foetus measured

The baby's hands.

Five month old foetus

The foetus' hands out of the mother's stomach..(a part of the abortion process)

This infant's brain was suctioned out, causing his skull to be collapsed. How does this protect the health of the mother?

This is what is left of another baby no more than 8 weeks old in the womb. This is an abortion. It is more pleasant to use the term than to see the results!

This foetus has its brains sucked out of its head in the abortion process.	As described on the right, this is what is left of the foetus.
